

# ***AT THE FIELD 14*** 11/11

It was a near perfect day at the field today and Kendon Townsel and Bryon Moore brought their helicopters out and held class on how to make these machines perform. Kendon brought his SAB Goblin 700 sporting 10,000 mAh and 44 volts of pure energy. He uses a Spektrum 7200 receiver and a DX-9 X-mitter.

# ***HCRCC***

Bryan brought his T-Rex 550 with a 4500 mAh 22 volt battery system pushing the Dominator motor. He uses a Spektrum 7610 Receiver and a DX-9 X-mitter. Their flights were nothing short of spectacular and their demonstrations drew lots of attention from the other pilots.
