

HCRCC - AT THE FLYING FIELD

October 3, 2010

45 Degrees greeted the early birds arriving at the flying field this morning. It was a delightful day and the weather guessers are saying this weather should last right through this Saturday's Fun Fly. The field is in very good shape and will be ready for the Saturday activities. See you at the field. JRM

Most of the Geezers know that Jim Brooks has been working very hard trying to encourage one of his planes to produce a good smoke system. Jim is wearing a big smile these days as his Rascal 110 now sports a functioning smoke system as these pictures substantiate. Way to go Jim!

New member Scott Bielski was at the field today. Scott was a former member of the Conley Flyers and just moved back to Georgia from California. Scott was flying a 3-D type plane - A OS-46 powered "Magic". Scott said he would try to come out Saturday.
