

# At The Field 2 8/25

# *HCRCC*

Joe Brett is all smiles when getting ready to fly his P-47 D Thunderbolt. Boasting over 100 flights already, his “Jug” is powered by an OS-95V 4 stroke motor and uses JR-7202 radio. This Top Flite ARF has become a quality performer for Joe.

Alan Fenton came to the field to show off his SU-35 twin ducted fan plane he purchased from “Motion RC”. He spoke of its excellent slow flight ability and then showed us what he meant. He flies with a Futaba - 8 channel radio and said his 4000 size battery gives him a short 4 min. run.
