Ron Cox says he has always had a love affair for the Cessna 195 and that he has approximately 50 hours of cockpit time in a full scale 195. So, naturally he has been searching for a high quality ARF 195.

# *HCRCC*

He was happy when he found this 90" wing span ARF from Aero Works with flaps. A 30 size DLE motor does a great job and Ron uses a Futaba 2.4 radio system. The 195 performs quite well.
