

# At The Field 8 9/13

# HCRCC

**Brian Hurley** brought his **TAFT Cobra Jet Fan 90** to the field Sunday and was giving some lessons in **S-M-O -O-T-H**. A 12 cell Glacier battery pack provides for a four minute flight when exercising some austere throttle management.

**Brian** uses a Futaba 14 radio system on his models and uses eight channels on the Cobra. He said his fastest documented flight so far with this bird has been just over 180 MPH. My! My!
