

At The Flying Field 2/7/5

Ed Moore was at the field this morning with his ***Great Planes Giant Scale Sport ARF Avistar***. Boasting flaps on its 90.5 inch wing this plane performs as great as it looks. A DLE-35 gas engine powers the plane and gives everyone the idea that it has more than enough muscle to perform. Ed uses a 14 channel Futaba radio system to show off this beauty.
